

LANCASTER
ITALIA

LANCASTER name can be traced back to 17th-century with the English watchmaker Edward Higgins.

He was an apprentice of Christian Huygens, the great Dutch mathematician and horologist often credited with the invention of the balance spring, one of the most important creations in the development of the watch. Huygens passed his Geneva-based business on Higgins, who renamed it LANCASTER (his home-town) and became known throughout Europe for the quality of his watches.

To this day LANCASTER founders has re-established the Brand, taking inspiration from Higgins' work naming the brand as his ancient business.

Since 1992 LANCASTER is an independent brand that produce innovative and sophisticated reliable timepieces in contemporary design for its fans and loyal consumers. LANCASTER's mission has been always providing "exceptional accessories at affordable prices" making the world of watches accessible to a larger audience.

Always thinking that "customers are the focus of our activities", in this first 25th Anniversary, we have been moving forward in international markets, launching unique and excellent watches-

Today, according to dynamic and ambitious trend-setters, LANCASTER is certainly one of the world's accessible watch brand able to offer and always guarantee high quality components and modern italian design.

And, following our credo, we are developing every day, new timepieces in great design, workmanship and quality.
